

NICHOLAS CORNAGHIE

Marion, IL | 618-694-8729 | nicholascornaghie@gmail.com

OBJECTIVE

Cybersecurity student seeking an IT Support Technician role to apply hands-on troubleshooting, hardware repair, and network defense experience, backed by strong communication skills developed through direct technology support work.

EDUCATION

John A. Logan College — Carterville, IL

Expected Graduation: Spring 2027

Associate of Applied Science, Cybersecurity

Relevant Coursework: Network Administration & Routing/Switching, Operating Systems, PowerShell Scripting, Network Security & Access Control, Cisco Networking 1 & 2

EXPERIENCE

Student Worker, IT Help Desk — John A. Logan College

Aug 2026 – Present

Carterville, IL

- Repair and troubleshoot desktop and laptop computers at the campus IT help desk
- Diagnose hardware and software issues and restore devices to working order
- Provide in-person technical support to students and staff

Technician / Software Specialist — iDoctor

Oct 2024 – Aug 2026

Carterville, IL

- Diagnose and repair hardware issues across a wide range of devices, including phones, tablets, and computers
- Troubleshoot software problems for customers on a daily basis, identifying root causes and applying effective fixes
- Work proficiently within Windows environments to resolve technical issues and restore device functionality
- Provide direct customer service in a technology setting, combining technical know-how with strong people skills to support a positive customer experience
- Explain technical issues and repair options to customers in plain, easy-to-understand language so they can make informed decisions without a technical background

ACTIVITIES & INVOLVEMENT

Logan Defenders — Cyber Defense Competition Team

Spring 2026 – Present

Member, John A. Logan College (CAE-CDE Designated Program)

- Participate in Collegiate Cyber Defense Competition (CCDC) preparation, building practical skills in network and system defense
- Installed and configured multiple operating systems and navigated Linux file systems in lab environments
- Completed simulated security injects designed to mirror real-world incident response and defense scenarios
- Continuing into a second semester with the team starting Fall 2026

TECHNICAL SKILLS

Operating Systems: Windows (proficient), Linux fundamentals

Hardware/Software: Device diagnostics, hardware repair, software troubleshooting

Networking & Administration: Active Directory, PowerShell scripting, Cisco routing/switching (CCNA 1 & 2)

Security: Cyber defense competition (CCDC) prep, network defense fundamentals

CERTIFICATIONS (IN PROGRESS)

- CompTIA Security+ — currently studying for exam
